

	General Notes & Guidance			
	For those third parties responsible for the design of the waterproofing system, such parties must ensure the proposed system and details shown herein are brought to the attention of those responsible for the overall design of the structure, to ensure compatibility of the waterproofing system and detailing with all elements of the structural design. Final decisions, acceptance and any recommendations must be approved in writing between such responsible parties.			
	For product installation, this drawing is to be read in conjunction with all relevant product data sheets and application guidelines.			
	Drawing Notes			
LUS formwork DLM	The waterproofing strategy should be designed in accordance with BS 8102:2022 `Protection of below ground structures against water ingress - Code of practice'.
